Scenario:
[Existing experience through a product or service]

	Entice	Enter	Engage	Exit	Extend
	How does someone become aware of this service?	What do people experience as they begin the process?	In the core moments in the process, what happens?	What do people typically experience as the process finishes?	What happens after the experience is over?
Experience steps What does the person (or people) at the center of this scenario typically experience in each step?	User discovers the Index of Economic Freedom through media or research interest. Reads about economic freedom index in a news article.	Logs into Tableau dashboard via a portal link. Searches for country-specific data.	Clicks through country comparison tools. Uses filters to explore freedom pillars.	Downloads data visuals for a report. export charts for presentation.	Revisits dashboard to track progress. Subscribes to updates or weekly reports. User uses insights for reports, policy briefs, or academic studies.
Interactions What interactions do they have at each step along the way? ▪ **People:** Who do they see or talk to? ▪ **Places:** Where are they? ▪ **Things:** What digital touchpoints or physical objects do they use?	Government publications or think tank reports. LinkedIn or academic sharing.	Login page with database authentication. User support or help docs for dashboard.	Interactive charts, heatmaps, and score tables. Tooltip data previews and column sorting.	PDF, PNG, and Excel export features. Session summary or confirmation prompts.	Email digests of data trends. Tableau public dashboard sharing or embedding. Periodic updates, alert emails, collaboration tools.
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Stay informed about global economic dynamics. Find trustworthy data for research/policy use.	Quickly access meaningful data without delays. Customize data view for regions or metrics.	Identify economic strengths and weaknesses. Analyze impact of different freedom components.	Compile insights into actionable policy steps. Share insights with team or public.	Monitor changes over time. Prepare follow-up studies or reports. Keep tracking changes, compare progress over time.
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Easy access to data via search or portals. Clear project summary attracts interest.	Smooth login process. Friendly interface with pre-filtered examples.	Quick filtering and instant visual updates. Logical layout of economic freedom metrics.	Clean exports and shareable visuals. Insightful summary included with data.	Helpful alerts on major changes. Useful for academic papers or presentations. Follow-up insights or notifications help maintain interest.
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Data seems too technical at first glance. Lack of context for scoring.	Confusing navigation for first-time users. Slow loading of heavy data sets.	Overwhelming number of indicators at once. No quick tutorial for dashboard use.	Loss of filters when exporting. No personalization in output format.	Infrequent data updates No feedback or improvement loop. Lack of regular updates or stale data.
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Add short videos to introduce the index. Simplify initial view with story-driven entry.	Use interactive walkthroughs or tooltips. Auto-save last-used filters.	Highlight key findings automatically. Add comparison snapshots.	Suggest brief summaries for decision-makers. Provide export customization (e.g., theme, format).	Enable user-created alerts. Add commenting or feedback options. Add tracking history or automated alerts for changes in a country's index.
